

ALLIED HEAT TRANSFER

COMPLETE TURNKEY COOLING SYSTEMS

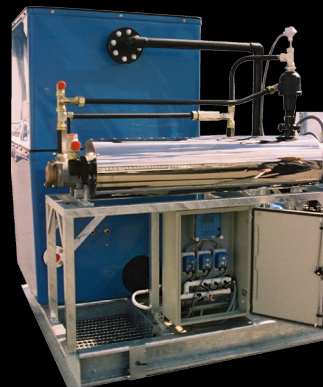

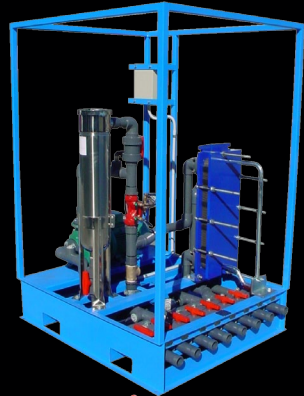

Our business is Heat Transfer and everything that goes with it. We make the custom cooling system that best suits your application. **We don't try to suit your need to our product we advise the best product for your need.**

Contact us and we will quote the best solution for you for **No Charge**. Detailed designs paid for or included in the cost of manufacture if you decide to purchase from us.

Custom cooling systems made that include the following design features:

- Plug and play electrics and piping, **just connect**
- Skid mounted, **easy transport and locate**
- Variable speed fans, **saving money on power bills**
- High & Low Ambients **extreme temperature range in the desert**
- Low fouling **for the cement works**
- Low noise **where site needed very low dBA**
- Corrosion resistant **at a hyper saline site**
- Light weight **for transport on the roads**
- Vibration isolator mounts **extreme tracking conditions**
- Easy clean **for every shift wash down**
- Compact design **where space is limited on truck mounted drill rigs**
- Heat recovery systems **The heat from the exhaust gas heats the water**
- Low water use **where water is very costly**
- Redundancy **where any breakdown for any reason would be catastrophic**
- Low drift loss **Legionella concerns meant conventional towers could not be used**
- Automatic water treatment **where site was remote**
