

ALLIED HEAT TRANSFER

Design and manufacture of **Air Cooled Heat Exchangers (ACHE)** to international standards. Whether your enquiry is for a new design, a replacement re-design, or a re-build/manufacture, Allied Heat Transfer applies the best thermal and mechanical designs with most suitable heat exchange tubes and materials combined with our high standard of welding & construction techniques to produce the best Air Cooled Heat Exchanger for the application. Codes & standards include AS 1210 ASME VIII AP 661

Horizontal, vertical, A or V frames

Low noise options

High Pressure designs

Low fouling element versions

Corrosion resistant materials

Re-builds of existing

Performance optimisation

Performance evaluation reports

Failure analysis

On-site cleaning & minor repair

Manufactured in various fin types, Extruded, G, L

Economisers

Fan re-build & balancing

Compliance inspections

Pressure testing certifications

NATA test facilities

WEST COAST

08 9455 5933

EAST COAST

07 3375 1544

AFTER HOURS

0407 449 966
